

Dear FOI Officer,

Helena Biosciences is a British diagnostic manufacturing company dedicated to the design, development and support of our clinical electrophoresis and haemostasis products.

Being the largest electrophoresis company in the UK, and exporting to countries all over the world, it is our strategic endeavour during these difficult economic times to use our expertise and resources to enhance the level of value, quality, innovation and services that we provide for the benefit of our NHS partners.

In order to provide an excellent service to our NHS partners today and in the future, it is essential for us to have the most up date information about their testing needs and working environments. We request this information under the Freedom of Information Act (2000).

We would be grateful if you could complete the enclosed form for each Hospital in the Trust and return it to us within 20 days of receiving this letter.

Request under Freedom of Information Act 2000

Thank you for your email of 27 March 2014. I regret to inform you that we do not hold the information you requested.

May we recommend that you contact Health Boards and Welsh Blood (which is part of Velindre NHS Trust) who may be able to help you with your enquiry:-
