Creating Connections

Public Health Network Cymru is back and this time we need YOU!!

For a network to be truly effective we need to identify and provide links between and across all members; to share information, promote services and learn from each other. To do this we need your help. How do we make the best use of your knowledge, expertise and enthusiasm using the tools at our disposal? How can you tell others about what you are doing? How can you ask others about their experiences? How can we find out about the great things happening in your area? And how do we make the network relevant to you? We have some ideas but want you to help shape your network and keep us on track...

These free events aim to give practitioners working in all areas of health promotion and health improvement across Wales the opportunity to meet fellow professionals, network and find out more about the resources on the new website.

Bring your own laptop, tablet or Smartphone and you can stay switched on!!

These half day events are open to any professionals who have an interest in public health from teachers and youth workers to nursing students, GPs to local government workers and the third sector.

The events are free to attend and a buffet lunch will be provided at all venues. Places are strictly limited so please book early.
